## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/08/2009 has been entered.

## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Colin Harris on November 10, 2009.

The application has been amended as follows:

In the claims:

Please cancel claims 1-3, 18, 20, and 26.

In claims 27 and 34, line 3 of each claim:

Replace "the first gas mixture" with "the first mixture gas".

The following is an examiner's statement of reasons for allowance:

Applicants have overcome claim objections and rejections indicated in previous actions by amendment and cancellation. With the additional requirement of "no period of cleaning the process chamber by use of a fluorine-containing compound", applicants overcome previous rejections in view of Chen (2005/0133059) and Shrotriya (6,068,729) (and further obviousness rejections). As written, instant claims require periods that consist only of the first and second mixture gas components (oxygen and argon and nitrogen and argon, respectively), therefore it would not be obvious to modify Shrotriya in any way (such as a chlorine-containing gas as is also known in the art) because the plasma would still contain a non-first mixture gas.

The teachings of Itoh (5,176,791) in view of Sun (2002/0033183) teach a process wherein a first mixture gas of oxygen and argon and a second mixture gas of nitrogen and argon are applied in a cleaning process that is used without any fluorine-containing step. While the chamber of Itoh includes oxygen, the chamber is "configured to perform an oxidizing process" but there is no indication that such an oxidizing process is performed. Furthermore, there is suggestion in the known prior art to deposit a seasoning layer in combination with the deposition process as taught in the references, nor is there reason to presume that the fluorine-less cleaning process taught would be effective in another process (such as an oxidizing or nitriding process).

There is no other known prior art that teaches applying two cleaning steps wherein mixture gases of the instant claims are applied and without any cleaning step

including fluorine wherein a seasoning step is performed before performing an oxidizing or nitriding process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOSEPH MILLER JR whose telephone number is (571)270-5825. The examiner can normally be reached on Mon-Thurs, 7am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on (571) 272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
